

# Integrity Clamp Covers™

EPDM

## PRODUCT DESCRIPTION

Integrity Products' Integrity Clamp Covers™ are designed to make it quick and easy to seal protrusions around pipe clamps on insulated piping systems. These clamp covers are made from a high-performing EPDM rubber for extra protection against temperature, mechanical damage, weathering, and UV and ozone exposure. The task of trying to install cladding around pipe clamps on insulated piping systems has traditionally been very difficult—requiring an excessive amount of time from even a skilled tradesperson to complete! Now with Integrity Clamp Covers™, you can achieve a neat and tidy finish with a water-tight seal in a fraction of the time.

## PRODUCT APPLICATION

Integrity Products' Integrity Clamp Covers™ are an efficient and cost-effective way to finish around pipe clamps on your insulated piping systems. These clamp covers allow you to form a water-tight seal at this high-risk location for water ingress. The covers are mounted over the pipe clamp, where they penetrate out from the cladding. They are then mechanically fixed to the cladding with screws. A bead of silicone is required around the edge trim, inline with the screw holes, and again around the perimeter of the installed Integrity Clamp Cover™, to create a water-tight seal. Save time and money, and reduce the risk of corrosion under insulation (CUI), with Integrity Products' Integrity Clamp Covers™.

## MATERIAL SPECIFICATIONS

### MATERIAL(S)

60 Durometer  
EPDM Rubber Cover/Cap

### COLOR

Black

### CHEMICAL DEFINITION

Ethylene Propylene  
Diene Monomer

### UV RESISTANCE

Excellent

### OZONE RESISTANCE

Excellent

### WEATHER RESISTANCE

Excellent

### TENSILE STRENGTH

1600 PSI

### ELONGATION

470%

### TEMPERATURE RANGE

-58°F to 300°F (-50°C to 149°C)  
*Constant Temperature*

### OTHER SPECIFICATIONS

ASTM D2000 Classification

## PRODUCT SIZES

Various sizes available.

## INSTALLATION

Place Integrity Clamp Cover™ over pipe clamp. Fix clamp cover with supplied machine screws. Run a small bead of silicone along the edge trim, screw holes, and around the perimeter of the installed Integrity Clamp Cover™.
