

# OUR PRODUCTS

## — INTEGRITY PLUGZ — — INSPECTION PORTS —

Patented flexible metal embedded in the edge trim ensures conformity and a tight seal || **Large, repeatable, and safe access** through the insulation to conduct various inspections (NDT, erosion, corrosion, etc.) || **Multiple shapes, sizes, and material compositions**

## — FIRE PLUGZ —

Replaces standard, non-fireproof inspection ports || Suitable for use on pipes and vessel cladding for **passive fire protection**.

## — INTEGRITY PILLOWZ —

Replaces the cut-out insulation underneath inspection ports || **Provides a heat barrier** to very high temperature applications and thermal value to prevent heat loss

## — INTEGRITY WATER INDICATOR (WUI) —

Provides a visual indication of possible water in the insulation system || **Early detection** can prevent costly repairs and damage

## — INSULATION SPACERS (PPS & SILICONE) —

Creates a unified and consistent air gap between the insulation and process pipe || **Prevents moisture** from coming into direct contact with the pipe

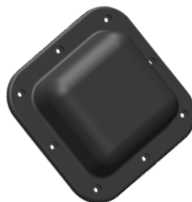

## — INTEGRITY TERMINATION GASKET —

Compartmentalizes your insulation preventing water from damaging the system || **Avoid costly replacement** of wet and damaged insulation || **A better solution for terminations**

## — INTEGRITY DRAINPLUG —

**Allows any water** in the insulation system to drain and airflow to enter || **Low cost solution** to reduce costly replacement of wet/damaged insulation

## — INTEGRITY CLAMP COVER —

Designed to make it **quick and easy to seal protrusions** around pipe clamps on insulated pipe || **A cost-effective solution** saving valuable time and money.
